

April 13th, 2023

Dear valued customers,

### Specification Change Notice for Hopper

Thank you for your continued support for OHTAKE products.

This is the notification to let you know we have made some specification changes in **Hopper**. We greatly appreciate your understanding and cooperation in this matter.

■Product model: Hopper NJ-80, NJ-80F, SR-80 series

■Description of changes:

1. Change in the shape of the screw storage cover and associated external dimensions (height)
2. Elimination of screw gate adjusting plate
3. Change in shape of rotor

Please refer to the next page for more detailed information.

■Description of reasons / backgrounds:

To improve productivity.

■Implementation:

The change will be implemented with the products from June 2023 production.

The implementation schedule may change depending on the stock status.

There is no change in operating specifications accompanying this change.

Should you have any questions or concerns, please contact OHTAKE sales team.

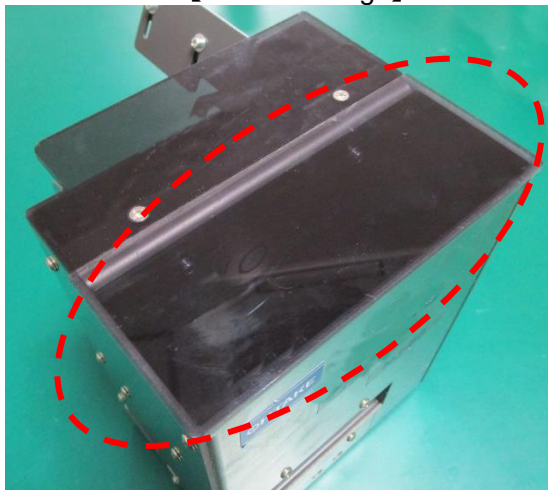

**OHTAKE Sales Division** E-mail: [sales.s@ohtake-root.co.jp](mailto:sales.s@ohtake-root.co.jp)

■Description of changes (more details)

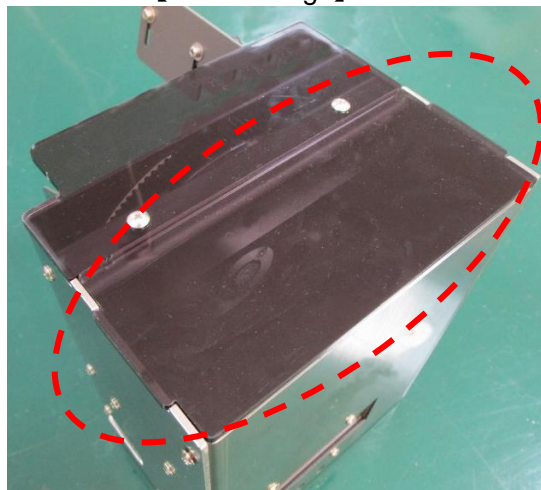

1. Change in the shape of the screw storage cover and associated external dimensions (height)

The shape of the screw storage cover will be changed and the height will be increased by 2mm accordingly.

【Before Change】

【After Change】

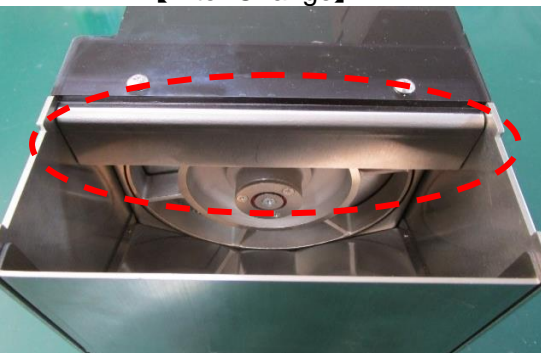

2. Elimination of screw gate adjusting plate

The screw gate adjusting plate is eliminated by integrating it with the main unit.

【Before Change】

【After Change】

3. Change in shape of rotor

Due to a change in manufacturing methods, there is a slight change in the inner shape of the rotor.
